

A Perinatal, neonatal and sociodemographic covariates

Filled = $p < .05$; open = not significant. Bold label = significant factor contrast (DIFFTEST $p < .05$). Continuous covariates fully standardised; binary covariates semistandardised.

B Developmental and behavioural outcomes

Latent correlations from the full measurement model.

Covariate domain (A)
● Neonatal ● Obstetric ● Sociodemographic

Outcome domain (B) / significance
● Bayley ● CBCL Broad ● CBCL Narrow ● Q-CHAT ● $p < .05$ ○ not significant
